

GAMS

Modeling for the real world!

MESAP/PROFAKO

MESAP (Modular Energy System Analysis and Planning Software) is a decision support system for integrated energy management. It offers tools for investment calculation, energy and environmental accounting, demand analysis, integrated resource planning, demand-side management, as well as electricity operation and expansion planning, life cycle and fuel chain analysis. **PROFAKO** is the MESAP optimization model for unit commitment planning in a liberalized energy market based on mixed integer linear programming (MIP).
